IP250UHD

Dante Firmware Update Guide

Firmware Update Process

Download and install Dante Firmware Update Manager for MacOS / Windows from the Audinate website: https://my.audinate.com/latest-firmware-update-manager

Please note: Audinate have a Dante Firmware Update Manager User Guide that can assist with the firmware update process or troubleshooting should any problems be encountered.

Once installed, open the Dante Firmware Update Manager software, select the network interface from your PC that is connected to the Dante network, then press 'Next'. Please note: the IP Address of your network connection should be in the Dante subnet range (typically 169.254.xxx.xxx).

BLUSTREA√√/→

3 Select 'Update Dante Firmware':

• Press the 'Browse...' button:

🕍 Dante Firmware Update Manager v3.10.6.2	- 0	×
aud	inate	
Firmware Up	date Manager	
Select Firmw	are Update File	
	Browse	
Override Device Matching		
	Back Next	

6 Browse to the IP250UHD Dante firmware file from the Blustream website, making sure to select the correct firmware for either Transmitter or Receiver unit, and select 'Open':

Choose firmware image for update			>

6 The firmware update software will scan the network for all Dante devices.

Select the checkbox to the left of each IP250UHD-TX or RX (for whichever firmware file selected previously) and press the 'Start' button to begin the firmware update process:

A warning message will pop up on the screen. Press 'OK' to continue the update process.

⁸ Once the firmware update is complete, a pop up message will appear advising that the devices have been upgraded. Press 'OK' to continue:

9 The IP250UHD devices will need to be power cycled after the firmware update is complete.

Firmware update complete
